

CALCULATING WAGES

Part 1

**Gross= without tax or other contributions having been deducted*

A. Salary

1. Maria's job pays her \$1500 a month. What is her gross weekly wage?

2. John grosses \$27,000 a year. What is his gross weekly wage?

A. Hourly

A regular work week is 40 hours. Overtime pay is time and one-half.

1. Isabel drives truck for \$8.75 an hour. If she worked 40 hours, what would her gross earnings be for one week?

2. Manual is a word-processor operator. He makes \$11.50 an hour. Determine his gross earnings for a week if he worked 52 hours.
