

Name : _____

Score : _____

Teacher : _____

Date : _____

Adding Fractions

1) $\frac{6}{10} + \frac{2}{3} =$

2) $\frac{4}{5} + \frac{1}{2} =$

3) $\frac{1}{3} + \frac{1}{2} =$

4) $\frac{1}{4} + \frac{2}{3} =$

5) $\frac{2}{3} + \frac{1}{5} =$

6) $\frac{1}{5} + \frac{1}{2} =$

7) $\frac{2}{4} + \frac{1}{3} =$

8) $\frac{2}{4} + \frac{1}{3} =$

9) $\frac{4}{5} + \frac{1}{4} =$

10) $\frac{2}{4} + \frac{6}{10} =$

Name : _____

Score : _____

Teacher : _____

Date : _____

Adding Fractions

$$1) \quad \frac{6}{10} + \frac{2}{3} = \frac{18}{30} + \frac{20}{30} = \frac{38}{30} = \frac{19}{15} = 1 \frac{4}{15}$$

$$2) \quad \frac{4}{5} + \frac{1}{2} = \frac{8}{10} + \frac{5}{10} = \frac{13}{10} = 1 \frac{3}{10}$$

$$3) \quad \frac{1}{3} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$4) \quad \frac{1}{4} + \frac{2}{3} = \frac{3}{12} + \frac{8}{12} = \frac{11}{12}$$

$$5) \quad \frac{2}{3} + \frac{1}{5} = \frac{10}{15} + \frac{3}{15} = \frac{13}{15}$$

$$6) \quad \frac{1}{5} + \frac{1}{2} = \frac{2}{10} + \frac{5}{10} = \frac{7}{10}$$

$$7) \quad \frac{2}{4} + \frac{1}{3} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12} = \frac{5}{6}$$

$$8) \quad \frac{2}{4} + \frac{1}{3} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12} = \frac{5}{6}$$

$$9) \quad \frac{4}{5} + \frac{1}{4} = \frac{16}{20} + \frac{5}{20} = \frac{21}{20} = 1 \frac{1}{20}$$

$$10) \quad \frac{2}{4} + \frac{6}{10} = \frac{10}{20} + \frac{12}{20} = \frac{22}{20} = \frac{11}{10} = 1 \frac{1}{10}$$
