## Linear Equations

Match the equation with its graph.

$$y = \frac{-2}{3}x - \frac{23}{3}$$

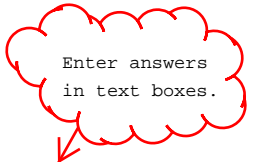

$$y = \frac{-3}{4}x + \frac{13}{4}$$

$$y = \frac{-1}{5}x + \frac{12}{5}$$

$$y = -x + 5$$

$$y = -3x + 21$$

$$y = \frac{9}{10}x + 4$$
