# Linear Equations

Enter answers  
in text boxes.

Match the equation with its graph. State the number of the graph by the equation.

$$y = \frac{4}{5}x - \frac{3}{5}$$

$$y = \frac{4}{3}x + \frac{31}{3}$$

$$y = \frac{-1}{2}x - \frac{1}{2}$$

$$y = \frac{-4}{5}x - \frac{24}{5}$$

$$y = -x - 5$$

$$y = x - 4$$
