

MATH170U36  
Final Exam  
Question 58

Print out the coordinate plane. Graph the five ordered pairs found in problem #57 and draw a straight line through the five points.

- a) State the ordered pair for the point where the graphed line crosses the  $x$ -axis.
- b) State the ordered pair for the point where the graphed line crosses the  $y$ -axis.
- c) State an ordered pair for another point on the line that is not listed in the table.
