Linear Equations

Graph.

1. A line that passes through the point (1, -6).
The line is perpendicular to another line

whose slope = $\frac{5}{4}$

2. A line that passes through the point (-1, -8).
slope = -1

3. A line that passes through the point (0, -1).
The line is parallel to another line

whose slope = $\frac{2}{3}$

4. A line that passes through the point (-2, -3).
The line is perpendicular to another line
whose slope = 1

5. A line that passes through the point (-5, -1).
The line is parallel to another line
whose slope = 1

6. A line that passes through the point (-3, -1).
slope = $\frac{7}{5}$
