

MATH170U29

Linear and Nonlinear Progressions, Functions, Graphing Functions, and Linear Equations
Question 10

Print out the table. For the function $y = x + 4$, find the y values for the x values provided in the chart. State the five ordered pairs.

$y = x + 4$			
$y = x$ plus 4			
Input (x)	Function rule ($x + 4$)	Output (y)	Ordered pairs
-6			
-2			
0			
1			
2
