

MATH170U29

Linear and Nonlinear Progressions, Functions, Graphing Functions, and Linear Equations
Question 12

Print out the table. Choose any five values for x and then find the corresponding y for the linear equation, $y = 3x + 1$. Write the ordered pairs.

$y = 3x + 1$			
$y = 3$ times x plus 1			
x	Substitution	y	Ordered pairs (x, y)
